Supplementary file 1. Stakeholder Mapping

1

Note:

Stakeholders in three key policy initiatives on integrated care in Belgium: Type 2 Diabetes Care Trajectories (adopted in 2008), National Pilot Projects (adopted in 2018) and the Primary Care Zones (adopted in 2019) in Flanders. The three policies are quite distinct. The care trajectory is a microlevel contract; the pilot projects on IC involve stakeholders from all governmental levels; while Flanders is organising its own reform, building on the same goals, but focused specifically on strengthening primary care. ^{30,35,36,57,66,73}
