|                  | 5244                 | 16 | 0.000 | 4517                 | 23 | 0.000 | 5257                 | 38 | 0.000 |

\* Five parallelism tests are listed in the table. p>0.05 is considered to pass the parallel test and an ordered logistic regression model, therefore, can be used; otherwise, Multinomial Logistic Regression would be used. a. Adjusted for age and sex.

b. Adjusted for all sociodemographic variables, including Townsend Deprivation Index, income, age, gender, and ethnicity.

c. Adjusted for all variables, including sociodemographic, body mass index (BMI), smoking, alcohol, sun exposure, physical activity, and sleep duration.

Table S2. Multicollinearity test

| Variable                           | VIF  | Tolerance |
|------------------------------------|------|-----------|
| Mood swings                        | 1.77 | 0.5650    |
| Miserableness                      | 1.62 | 0.6189    |
| Irritability                       | 1.32 | 0.7555    |
| Sensitivity/hurt feelings          | 1.41 | 0.7099    |
| Fed-up feelings                    | 1.71 | 0.5862    |
| Nervous feelings                   | 1.61 | 0.6215    |
| Worrier anxious feelings           | 1.48 | 0.6761    |
| Tense/highly strung                | 1.42 | 0.7035    |
| Worry too long after embarrassment | 1.42 | 0.7066    |
| Suffer from nerves                 | 1.45 | 0.6897    |
| Loneliness/isolation               | 1.26 | 0.7957    |
| Guilty feelings                    | 1.34 | 0.7469    |
| Risk taking                        | 1.09 | 0.9198    |
| Age                                | 1.42 | 0.7024    |
| Sex                                | 1.17 | 0.8523    |
| Ethnic background                  | 1.04 | 0.9661    |
| Qualifications                     | 1.06 | 0.9448    |
| Current employment status          | 1.40 | 0.7150    |
| Sleep duration                     | 1.02 | 0.9791    |
| Alcohol intake frequency           | 1.09 | 0.9137    |
| Smoking status                     | 1.05 | 0.9507    |
| Body mass indebmi                  | 1.08 | 0.9267    |
| MET                                | 1.03 | 0.9745    |

Table S3. Adjusted OR (95% CI) of negative emotions in three groups.

| Characteristics<br>[ "No" as reference] | Model 1 <sup>a</sup>    |                       |                         | Model 2 <sup>b</sup>    |                       |                         | Model 3 <sup>c</sup>    |                       |                         |

a. Adjusted for age and sex.

b. Adjusted for all sociodemographic covariates, including Townsend Deprivation Index, income, age, gender, and ethnicity.

c. Adjusted for all covariates, including sociodemographic, body mass index (BMI), smoking, alcohol, sun exposure, physical activity, and sleep duration.

\* The results were significant at the 0.05 level

\*\* The results were significant at the 0.01 level

Table S4. Adjusted OR (95% CI) of covariates in three groups.

- a. Adjusted for age and sex.
- b. Adjusted for all sociodemographic covariates, including Townsend Deprivation Index, income, age, gender, and ethnicity.
- c. Adjusted for all covariates, including sociodemographic, body mass index (BMI), smoking, alcohol, sun exposure, physical activity, and sleep duration. \*

The results were significant at the 0.05 level

\*\* The results were significant at the 0.01 level
